He made resistence. Theofficer making the arrest was struck in the back with a boulder thrown by a boy. Our information is that a lively time ensued.

had been properly arranged, and the invitation given to "come, help yourself, then came something else—the rain, welcome rain, thrice welcome, if the merry picnicers did have to jump around lively and gather up the sweetmeats. Yes welcome rain, if fair maidens and bashful young gentlemen were uncomfortably 12 crowded together in buggies, and carriages, and were compelled to finish their holiday dinners with a limited amount of pellow room. There was no growling, on account of the weather, all seemed to enjoy the occasion very much.

We could not see that the rain had marred the pleasure of the company in the least. Col. C. H. Beall and Uncle Joe Gist, with a number of others, were gathered in the boiling house, where the sugar water is boiled, making things lively. John C. Palmer, Sam. Wauph and Wyle Mulholland, kept things moving in their department. The Messrs. McElroy, Beany and Houte furnished some enlivening music for the occasion. All in all, a good time was had. About 4 p. M. the party dispersed for their respective homes.

On Friday evening last, the graduating class of the High School entertained slarge and respectable audience in school hall, with the following programme:

Some of our newspaper scribes were taken in last week by a report gaining circulation that an infant had been caught in the river at the Black Horse Landing on a fish line by some parties who were fishing. The daily papers that are always thirsting for sensational news rather than facts, came out with specials stating the fact of the finding and that the people bere were very much excited over the sifair, and that some of the elite in society might be implicated in a scandal as well as a crime. We should like the report corrected, as the whole thing was gotten up for some purpose which we cannot now tell.

IT is a mistake to attribute malaria and similar illesses to the bad effects of the climate. Sir Henry Thompson, in London, in a recent letter to the Times, says, "Impure drinking water, not the climate, is the cause." Instead of spending large sums on wines and other luxuries, he counsels to invest a fraction of such expendi ture on a pure natural mineral water foeveryday's use; it gives safety, and its ef-fervescence makes it extremely pleasant.
